

Math Fables Too: Making Science Count

From 1 to 10, these lessons that count are math magic for learning addition. For children who have graduated from MATH FABLES, MATH FABLES TOO will help kids learn to count and, more important, lay the groundwork for addition. When children learn to group numbers at an early age, everything else -- place value, arithmetic, problem-solving -- flows naturally. These animal fables will also encourage kids to become more interested in science by building on their natural fascination with animals of the oceans, jungles, deserts, lakes, and backyards. Math and science -- a winning combination!
